Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, 24-46 drawn to a composition comprising a cationic lipid compound and a method for delivering a biologically active agent to a cell of an animal and kits containing the composition, classified in class 424, subclass 450, class 435, subclass 458, for example.
- II. Claims 21-23, drawn to a composition comprising a cationic lipid compound and kits containing the composition, classified in class 424, subclass 450, for example.
- III. Claims 1-20, 24-46, drawn to a composition comprising a cationic lipid compound and a method for delivering a biologically active agent to a cell of a plant, classified in class 424, subclass 450, and class 435, subclass 468, for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are mutually exclusive and independent. The composition comprising a cationic lipid compound of Invention I is of materially separate and different structure than the composition comprising a cationic lipid compound of Invention II.

Inventions I and III are mutually exclusive and independent. The method for delivering a biologically active agent to a cell of an animal requires materially different and separate protocols than the method for delivering a biologically active agent to a cell of a plant.

Inventions II and III are mutually exclusive and independent. The composition and kit in Invention II is not required for the method for delivering a biologically active agent to a cell of a plant of Invention III, and vice versa.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thaian N. Ton whose telephone number is (703) 305-1019.
